

WEEKLY REPORT

Work done in last week (Attach supporting Documents):

1.

Task:-

To identify if something goes wrong e.g. Student data got exposed, login to wrong user's profile, database leak etc.. We have covered such breaches so we need to prepare the document about how we can prevent the breaches.

This is basically covering more of the document level changes including some code examples and methodologies.

I created a document called Breach Prevention and Problem Solution. This was with reference to the task assigned.

Then another document called Consent and Proof of Consent. This contains all the sample consent forms that can be check marked by user. It has ready to use consent text for all modules. It also contains the mechanism for storing proof of consent including logs, timestamp of when user agreed, user details etc. (With compliance to dpdp act).

2.

Task:-

Next is the Prediction safety using AI.. Please check Part J from the document. We have to prepare a separate document for this. Allowing what can be accessed by students and how teacher can identify if 100% is AI or 50% or 20%.. Also about parents, schools etc..

I prepared the Part J document.

Task:-

Received two reference documents:

- 1) Part J Developer Guide
- 2) Part J AI Safety Policy

And, one task list document:

- 1) Part K Task List

Generate the technical and platform related items : #2, 3, 4, 5, 6, 7, 8, 9 from Section - 1
#1 - Keep it pending

I completed making the following documents:-

- 1) Terms and Conditions - Draft Only
- 2) Child Data Protection Policy

NOTE:- Highlighted part is either note to internal team or content that needs to be replaced with correct values e.g. email addresses, dates, etc.

3.

Carried on the work of creating the legal documents from the previous day, from Part K task list.

Completed the following documents:-

- 1) School Data Processing Agreement
- 2) Consent Policy
- 3) Data Retention Policy
- 4) Cookie Policy
- 5) Breach Response Policy

4.

Created the AI usage disclaimer document file.

This marked the conclusion of all Section - 1 tasks from the Part K Tasklist.

Part L only has the week wise task lists.

Move to Part M.

Created a Breach Prevention Checklist.

Part M: Practical Checklist for team

Daily Security Checklist

The team should ask these questions during every review:

Is this data necessary?

Is consent captured?

Is child data involved?

Is parent/guardian consent required?

Is the API protected?

Is role permission checked?

Is school-level isolation checked?

Is the file private?

Is sensitive data logged?

Is data shared with a third party?

Is the data encrypted or protected?
Is there a deletion/retention process?

5.

Move to Part N. Learn Burp Suite Community and test the portal.

I've gone through how burp is used, and made myself familiar with the interface.
Also completed download, setup and signup.

Burp is not showing all the vulnerabilities, and is asking for premium. I have an alternate free software, called openVAS. It is free and checks for more number of vulnerabilities. And I have also used it before.

Installed OpenVAS on my Kali Linux Virtual Machine. Finished the setup.

Queued the initial feed sync of OpenVAS.

6.

Task:-

<https://app.sproutmentors.com/login>
credentials: (provided)

sproutmentors.com (Domain Name)

OpenVAS test to be done on the above URL.

Started the Vulnerability Scan (Penetration Testing) for the Domain Name given.

Requested for other task in the meantime.

Task:-

We have prepared the role based access interface and data like this so can we review and implement if the role based data access is secured? (Shared trial-provisioning.html)

Relevant with the data of request demo which you filled up couple of weeks back. (Shared trial-data-models.md)

Submitted review of Access Interface.

Reason for incomplete work:

1. No Incomplete Work

Plans for next week:

1. OpenVAS Scan, Uptime Kuma, Part N, O as per master document.
